

## **Oak Woodland Restoration Decision Points Summary**

**March 4<sup>th</sup>, Forest Practice Committee Meeting**

### **Options to come to consensus upon should regulatory action be further developed:**

- **Should prairie, grasslands, savannahs, and/or wet areas be included within the regulation?**
- **What *Quercus* species should be addressed?** Most discussion has focused upon Oregon White and California Black Oak. Is that the extent of the species being considered?
- **What geographic extent should the regulation apply to?** Coast District, Northern District, both Districts, extent of range of species being addressed, other?
- **Is oak retention standards going to be included within regulatory language?** Discussion has occurred that indicates that oak retention standards would be considered a separate matter that separate rulemaking efforts would address. Is this the current trajectory for this regulation?
